

**Fast. Proven.
Right-priced.**

**Keep costs low.
Keep quality high.**

*Our certified technicians
troubleshoot and repair
many railroad essentials.*

Overview

Rail Electronics Repaired Fast.

Repair electronic technologies used at track side, on-train, field locations, and in mobile environments.

Quick turn-around with tested results and extraordinary customer satisfaction, the PST IceHouse provides an alternative to sending equipment to original manufacturers. With the ability to choose individual component repair instead of full device replacement, railroads now have even better options for cost-effective management.

- **3 Day average cycle time**
- **State-of-the-art testing/diagnostic stations**

Field/Mobile Tech

Kenwood Radios
Mobile NX 5700 Dual Head

Users can

- Select OEM or Refurbished component repair
- Expect a 99.5% satisfaction rate
- Configure and certify new equipment

Why replace an entire circuit board when an individual component can be replaced by a certified technician?

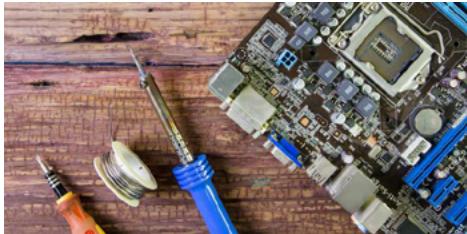

Certified Ritron Repair Facility

ICEHOUSE™

Rail Technology Repair Services

How we do what we do:

We work at the component level (e.g., upgrade, modify, or repair). That is why our prices are so low (versus buying boards and replace them out). This requires a qualified/motivated staff, alignment with manufactures, strict guidelines, standard work, and correctly calibrated tools are used to repair, upgrade, test, calibrate, and deliver certified equipment in good working order.

- **Experience:** The PST IceHouse is used by well known Class I's and switching/transload operators
- **Certifications:** Our technicians are:
 - FCC GROL Licensed
 - IPC Soldering Certified
 - Ritron, Wabtec, DPS, Kenwood Qualified and more...
 - A+ Certified
